

California Regional Water Quality Control Board
North Coast Region

Monitoring and Reporting Program No. R1-2004-0057

FOR

Don's Gas
15880 South Highway 101
Klamath, California

Del Norte County

MONITORING

1. The presence of floating product shall be evaluated in each monitoring well monthly. If detected, the thickness shall be measured to at least 0.01 foot increments monthly.
2. The depth to groundwater in each monitoring well shall be determined to at least 0.01 foot increments monthly. The results of each event's elevation shall be reported in tabular form indicating the surveyed elevations of each well reference point, depth to groundwater from reference point, and the actual groundwater elevation. The data generated from the elevation readings must be referenced to mean sea level.
3. Each monitoring well shall be sampled quarterly. The analyses shall be performed at a certified laboratory for Total Petroleum Hydrocarbons (TPH) as gasoline, TPH as diesel, TPH as motor oil, benzene, toluene, ethylbenzene, xylene, methyl-tertiary butyl ether, tertiary butyl alcohol, di-isopropyl ether, ethyl tertiary butyl ether, and tertiary amyl methyl ether.
4. The spring identified on the attached map (Attachment A) shall be sampled twice a year (during April and October) for TPH as gasoline and methyl-tertiary butyl ether.

REPORTING

A groundwater elevation contour map shall be submitted for each set of measurements and include the facility, groundwater flow pattern including the direction of the groundwater gradient, and the location of the wells measured. Monitoring reports, including gradient data and sampling data, shall be submitted to this office in accordance with the following schedule:

Reporting Period

Due Date

January, February, March

April 20

April, May, June

July 20

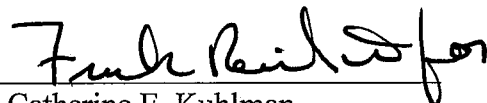

July, August, September

October 20

October, November, December

January 20
